North Sumatra, Indonesia

A Computer Technology graduate from Institut Teknologi Del with hands-on experience in web application development through an internship and academic projects. Experienced in developing applications and features using PHP, CodeIgniter, JavaScript, and MySQL, with a good understanding of database management and web-based systems. Familiar with debugging, testing, and improving features to ensure applications meet requirements. A fast learner with a strong interest in contributing to the development of technology solutions.

EDUCATION

Institut Teknologi Del - **Laguboti, North Sumatra, ID** Aug 2023 – Sept 2026
Diploma in Computer Technology

- GPA 3.39 out of 4.00
- Student Consultative Assembly (MPM) – Del Institute of Technology | Member of Commission E (Public Relations, Publications, and Creative Works)

WORK EXPERIENCE

PT. Angkasa Pura Indonesia - Bandar Udara Internasional Soekarno Hatta Mar 2026 - Jun 2026
Divisi IT NON-PUBLIC

PT Angkasa Pura Indonesia is a state-owned enterprise (BUMN) specializing in airport and air traffic services in Indonesia. The company manages several airports throughout the country and is committed to providing safe, comfortable, and efficient air transportation services to the public.

- Developed 3 internal web-based systems for the IT division, including a digital signage system that replaced manual banner updates and an IT asset monitoring dashboard.
- Developed and improved application features using PHP, CodeIgniter, MySQL, HTML, CSS, and JavaScript based on operational requirements.
- Conducted feature testing, debugging, and bug documentation to identify issues and support application improvements before release.
- Performed data recaps and assisted with application maintenance and other IT operational activities in collaboration with the IT team..

PROJECT EXPERIENCE AND SKILL

Siregar Aek Nalas Village Profile Website - Academic Project | 2024
Stack: HTML, CSS, JavaScript

- Designed an accessible UI/UX for a village profile website as a public information platform
- Created village information pages and public announcements
- Implemented responsive display using HTML, CSS, and JavaScript
- Integrated dynamic content and optimized website loading speed

IoT Weather Monitoring System - Academic Project | 2025
Stack: PHP, MySQL, ESP32, LoRa, MQTT, Node-RED, HTML, CSS, JavaScript

- Developed an IoT-based weather monitoring system using ESP32 to collect temperature, humidity, light, rainfall, and wind-speed data.
- Implemented wireless telemetry using LoRa to transmit sensor data from the device to a gateway.
- Built a data processing pipeline using MQTT and Node-RED to receive and process telemetry before storing data in MySQL.
- Developed a web-based monitoring dashboard providing real-time visualization, historical data, and device location information.
- Integrated multiple system components across device, communication, data processing, database, and monitoring layers.

TAKAH – Document Digitization and Entry System - Internship Project | 2026

Stack: CodeIgniter 4, PHP, MySQL, HTML, CSS, JavaScript, Git

- Developed a web-based document management system supporting procurement and administrative processes.
- Implemented multi-role approval workflows, digital signatures, file management, and activity logging.
- Designed relational database structures to support document workflows and data traceability.
- Developed supporting modules for technical evaluation, justification, and electronic archiving.

Tonella and Simple Application Monitoring System - Internship Project | 2026

Stack: CodeIgniter 3, PHP, MySQL, HTML, CSS, JavaScript, AJAX

- Developed a web-based IT asset monitoring dashboard to track printer and laptop maintenance status.
- Implemented AJAX-based interactive charts for daily and monthly maintenance analysis.
- Added maintenance history reporting functionality to support operational data tracking and analysis.

Banner Posko Application - Internship Project | 2026

Stack: CodeIgniter 3, PHP, MySQL, HTML, CSS, JavaScript

- Developed a web-based digital signage system for managing image banners and YouTube content.
- Implemented scheduled banner activation and deactivation with automated status handling.
- Developed an administration panel for banner management, running text, and clock display configuration.

TECHNICAL SKILLS

- Programming: PHP, JavaScript, HTML, CSS
- Framework: CodeIgniter 3 & 4
- Database: MySQL, Relational Database
- Web Development: REST API, AJAX, Responsive Web Development
- Version Control: Git, GitHub
- Development Tools: Visual Studio Code, XAMPP
